

Double Major

Double Major: A double major is a program of study that meets the requirements of two distinct majors in a single bachelor's degree. Engineering students interested in pursuing more than one major should discuss the possibility with their academic advisor in Engineering before applying to the other program. Because of prerequisites and course scheduling, the College of Engineering makes no guarantee that students pursuing more than one major will be able to take any engineering course during any semester of their choosing. Students should not expect to complete more than one major in four years. Multiple majors, regardless of college, will appear on the student's transcript.

Engineering must be the primary major for all double-major students. Admission is based upon merit and space available in the intended second major. Applications are due Dec. 1 (for the following Spring Term) and May 1 (for the following Fall Term). [The form can be found on the Current Engineering Undergraduate Students Intranet site.](#)
