

NUR 4120: Community & Population Health

Nursing care in the community for individuals, families, and populations. Emphasis is placed on the health-illness continuum and community and public health standards of best practice, utilizing the nursing process to promote health, prevent disease, and reduce health disparities. Application of concepts will be accomplished through didactic and clinical learning environments.

Credits: 7.0

Prerequisites:

NUR 4111 and NUR 4115 and NUR 3122

Program: [Nursing](#)
